

Freeway Archiver

the complete media management and acquisition system

the easy way to store and record a wide range of media formats from a central database system with full network capabilities

More and more there is a growing need to store and catalogue a wide range of file formats. Traditionally these have been standard formats such as spreadsheets, word documents etc. As well as storing any type of file format, Freeway Archiver takes file management to a new level with an archiving system that includes a wide range of media formats as well as the ability to store and backup to CD and DVD media. It is important to emphasise that the system is not designed for full video and audio production, Freeway Archiver is the system that will store and record all your finished information in real time and track all the media either on your stand alone desktop or network.

Real Time Recording from a wide range of Encoders

Analogue, DV, and SDI inputs/outputs

Wide range of storage solutions available

Store a wide range of Video formats such as AVI, MPEG, DivX, MPEG4 etc
