

FreewayStream

Media Systems for the Web

video streaming and video on demand web TV systems from Cameron Communications

Freeway Webstreaming Solution

Cameron introduce the low cost flexible solution for your live cast applications

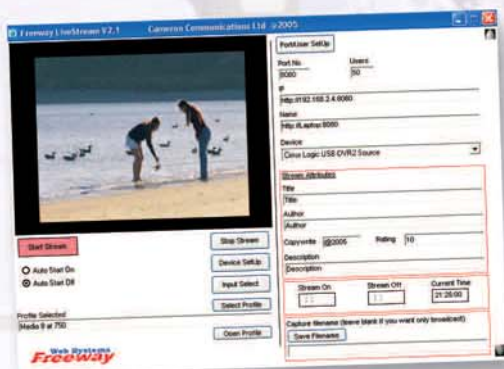

A wide range of video and audio inputs are available from Composite Video, S-VHS, Component, SDI, balanced or unbalanced audio.

For portable use, our 'Cube' offers flexibility to transmit from anywhere.

For more permanent installations, our 2U rack mount solution offers reliability along with superb performance.

Cameron Web Streamers offer simple to use software with variable bit rates up to broadcast quality working on a Windows XP platform.

Features such as number of users, stream title, web cast time on - time off, infinite profiles and simultaneous recording are just some of the features on the software.

Cameron's Web Streamer uses Microsoft Media 9 encoding format giving superb stream quality with minimal costs for license distribution.

Freeway WebTV

Freeway Web TV Channel System

Control your Video on Demand Web Streams using Cameron's easy to use software and hardware solution allowing you to encode, manage, script and upload to your designed web sites

Encode your video programs to Windows Media 9 format from any video source.

Manage all your content using the easy to use library software.

Use the library to organise your video streams to the desired playlist.

Up to 100 playlists can be configured with any number of video streams per playlist. A single click will write the script for the playlist.

Design your web page, drawing your Windows Media playlist on your web page.

Using the Library software, the system will upload all the playlists and video streams directly to your web server.

Now you can view the web pages and watch the updated web streams.
